Tools & Software: Git, MongoDB, Jest, Karma, Firebase, SASS

Professional Experience

4Create, Remote

2023 — 2024

Senior Angular Developer

Managed complexity and streamlined development processes by segmenting projects into various domains. Shared expertise with development team by serving as a Senior Angular Developer at 4Create. Ensured successful delivery of MVP by showcasing flexibility and adaptability in response to project needs.

- Supported development of software for Medical Studies as part of a large-scale team comprising 200+ members.
- Fostered effective teamwork and communication across borders by collaborating with Clario from the US on a medical case study application.
- Played a crucial role in delivering multiple MVP modular single-page applications over nearly a year by demonstrating proficiency and dedication in project execution.
- Sharpened skills in Angular development and reinforced the importance of adaptability in dynamic project environments through hands-on experience.

Voicy Network, Remote

2021 — 2022

Front End Developer

Contributed to platform development and optimisation by working as an Angular developer on an exciting project for Voicy Network, an online platform for sound gifs. Ensured readiness for launch and optimal user experience by finalising the platform and preparing it for production.

- Gained valuable experience during the project by working with such a talented and dedicated team.
- Served as an Angular developer within a compact team to successfully deliver MVP for the Web Application.
- The platform developed together, which can be found at <https://www.voicy.network/>, stands as a testament to the skills and expertise contributed to the project.

Played a key role in enhancing user interface to optimise functionality by joining Seller Chat Bot as a front-end developer. Focused on refactoring, redesigning, and integrating new UI elements for both new and existing features over a period of two to three months. Took on the responsibility of leading front-end development for the Seller Chat Bot Facebook Messenger chatbot application, targeting Amazon sellers.

- Visit the website at <https://www.sellerchatbot.com/> to explore the application and its features.
- Received recognition for hard work and dedication, as well as got an offer from the CEO to learn Angular, a modern web application framework.
- Acquired proficiency in Angular development and expanded skills by attending training sessions directly from the CEO.

Freelance Experience

Self-Employed – Upwork, Remote
Front End Web Developer

Delivered high-quality solutions to a diverse clientele as a full-time freelancer by working as a Full Stack Developer (MEAN Stack) for several years. Gained extensive experience in developing various web projects, ranging from simple landing pages to complex applications.

- Maximised client satisfaction by prioritising delivery of exceptional service.
- Enhanced skills and broadened knowledge by actively seeking new and challenging opportunities.
- Established a reputation as a dependable and valued freelancer.
